

Job Title

Engineer – Software Support

GreyOrange is looking for enthusiastic and technically strong Engineering graduates to join our Software Support team. As an Engineer – Software Support, you will play a critical role in supporting and maintaining software applications that power warehouse automation and robotics solutions across global customer locations.

This role offers an excellent opportunity to work on real-world enterprise applications, troubleshoot complex technical issues, interact with cross-functional teams, and build expertise in software support, databases, and system operations.

Key Responsibilities

- Provide technical support for software applications deployed across customer environments.
- Monitor application performance and ensure smooth day-to-day operations. Troubleshoot and resolve application, database, and system-related issues.
- Analyze logs, system behavior, and error reports to identify root causes.
- Execute SQL queries to investigate and resolve data-related issues.
- Work with Linux-based systems for application support and maintenance activities.
- Collaborate with Engineering, Product, and QA teams for issue resolution and continuous improvement.
- Ensure timely communication and high customer satisfaction while handling support cases.
- Support software deployments, validations, and configuration activities.
- Maintain technical documentation, SOPs, and knowledge repositories.

Technical Skills

- Good understanding of Linux commands and Linux operating system fundamentals.
- Strong knowledge of SQL queries, database concepts, joins, and data retrieval.
- Proficiency in at least one programming language such as Java, Python, C++, or similar.
- Understanding of Data Structures and Algorithms fundamentals.
- Knowledge of Operating Systems, Computer Networks, and Database Management Systems.
- Strong analytical and problem-solving skills.

Soft Skills

- Excellent verbal and written communication skills.
- Ability to learn quickly and adapt to a fast-paced environment.
- Strong ownership and customer-centric mindset.
- Good teamwork and collaboration skills.

Eligibility Criteria

- B.E./B.Tech graduates from Computer Science, Information Technology, Electronics & Communication, or related engineering disciplines.
- Graduation Year: 2026 (or as applicable).
- Consistent academic performance throughout academics.
- No active backlogs at the time of joining.

Preferred Qualifications

- Hands-on experience through internships, academic projects, or certifications related to Linux, SQL, or programming.
- Exposure to scripting languages such as Python or Shell scripting.
- Familiarity with cloud technologies, APIs, or software deployment concepts is a plus.

What You'll Gain

- Opportunity to work on cutting-edge warehouse automation and robotics software.
- Exposure to enterprise-scale applications and global customer environments.
- Structured learning and mentorship from experienced engineers.
- Career growth opportunities in Software Support, Product Engineering, Site Reliability, and Platform Operations.

Location

Gurugram, India

Shift Requirement

Willingness to work in rotational shifts and provide support for global operations.
